RE: PM 1146 Your ref PM-83-1
NOVEL PYRAZINE ETHERS AND THIOETHERS

Dear George:

Inventors Williams and Southwick have sent the enclosed memo dated September 27, 1983, giving subjective evaluations by an expert smoker panel of some of their products. Conventional cigarettes were flavored by applying alcoholic solutions of the flavorant by means of a hypodermic syringe, then conditioning 24 hour or longer until the ethanol had dissipated. The ppm values refer to the proportions of flavorant to filler.

I hope this will give you enough to proceed with preparation of an application, probably with claims to items 1, 3, and 4 of your letter of March 9.

Very truly yours,

G. Esler Inskeep
